

DIGITAL TWIN MEETS 3D-COVERAGE

Innovation In Signaling

The Next Level of Smart Planning

Pfannenberg enhances the traditional Digital Twin approach by integrating 3D-Coverage, enabling realistic visualization of signaling performance within the virtual design environment. In combination with Digital Twin/BIM, common Multi-CAD formats, and the Pfannenberg Sizing Software (PSS), this opens up new possibilities for precise, efficient, and standards-compliant design.

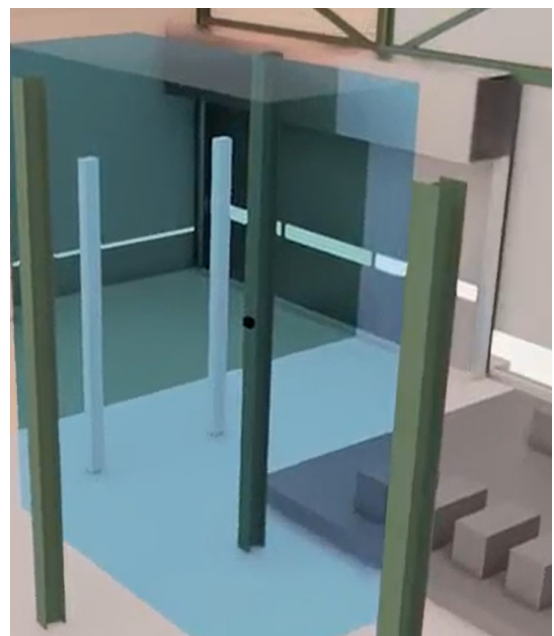

Smarter Than Standard Models

Unlike basic 3D models, Pfannenberg's Digital Twin focuses on safe signaling within clearly defined environments. The interactive model responds to real-world conditions and supports early compliance with legal and safety-related requirements such as EN 54-23 and ISO 7731.

Key Benefits at a Glance

- Visualization of audible and visual coverage
- Optimized placement of signaling devices
- Standards-compliant system design
- Prevention of planning errors through simulation-based coverage zones
- Fewer devices required – with no compromise on safety
- Increased efficiency and reduced costs from the very beginning

Integrating 3D-Coverage, the Digital Twin moves beyond visualization to validate safety zones, ensure compliance, and optimize signaling layouts in the planning phase cutting risk and installation effort.

Tools & Formats for Planners

Your digital toolbox for future-proof signaling

Multi-CAD Data

- Supports SolidWorks, CATIA, Siemens NX, Autodesk Inventor, and more
- Available in 2D, 3D, E-CAD, & CAM formats
- Download directly from each product's detail pageformats

BIM & REVIT Libraries

- Visualize signaling coverage in 3D-building models
- Ensure complete coverage during early planning
- Revit libraries available for selected signaling products

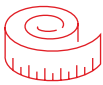

SISTEMA Library

- Easy integration of Performance Level (PL) certified devices
- Fully supports EN ISO 13849-1 compliance
- Available for download and system planning

EPLAN Macros

- Pre-configured macros for fast electrical planning
- Reduce errors and save engineering time
- Available via product-specific download sections

Pfannenberg Sizing Software (PSS)

- Select the right signaling solution with confidence
- Prevent under or over-dimensioning
- Increase energy and cost efficiency

Tender Specifications

- Supports GAEB XML, GAEB 90, DATA NORM 5, ÖNORM
- Custom exports: WORD, EXCEL, PDF
- Simplifies public/private procurement compliance

Alarm System Design Sheets

- Planning aids for wall and ceiling mounted devices
- Ensure full area coverage for visual alarm devices
- Free downloads available per product

Charismatic Value Library (VDMA 66413)

- Standardized safety-related product data
- Seamless integration into calculation and CAx tools
- Available for download and system
